

WHY IRT USES PETSCREENING™

Pet Policies Matter to All Residents

We believe in healthy and responsible pet interactions for all residents and want to create a community that welcomes everyone to a pet-responsible environment.

To provide our residents with the most pet-friendly and pet responsible experience, all pets and animals on our property must be documented. Residents and their animals can put other residents—and animals—at risk which creates liability for a pet owner. When residents fill out a digital PetScreening profile they acknowledge their understanding of our pet policies, how to adhere to them and potential penalties.

Unauthorized Pets

Residents with or without pets and animals acknowledge our pet policies at the time of application. Residents sometimes acquire a pet or animal after move-in and PetScreening ensures they fully understand the community guidelines, should they desire to obtain a pet or animal at a later date. Sometimes friends or family will ask you to take care of their pet for a day or even for an extended period of time. We consider these unauthorized pets because they are not on the lease.

Unauthorized pets and assistance animals include:

- Short or long-term pet sitting
- Pet Fostering
- Pet/ animal Visitation

Emergency Preparedness for Your Pets

PetScreening gives you fast and easy access to your pet's vet records, microchip information and photographs at any time. If your pet or animal should get sick, lost or have an emergency while travelling, you have immediate access to your animal's records on any digital device. At work, at home, or away your pet records are always available to you.

Ensure Compliance for Service and Support Animals

PetScreening reviews all assistance animal accommodation requests for residents with disabilities and disability-related needs in accordance with the HUD/FHAct guidelines. The verification process helps ensure each reasonable accommodation request meets the federal HUD guidelines, further supporting a pet-and animal-responsible experience for all residents.

By acknowledging our pet policies in PetScreening, you will know what is allowed within your lease terms at our community and how to properly report a visiting pet. Contact the leasing office to learn more about pet and animal policies.
